CAPTIVA

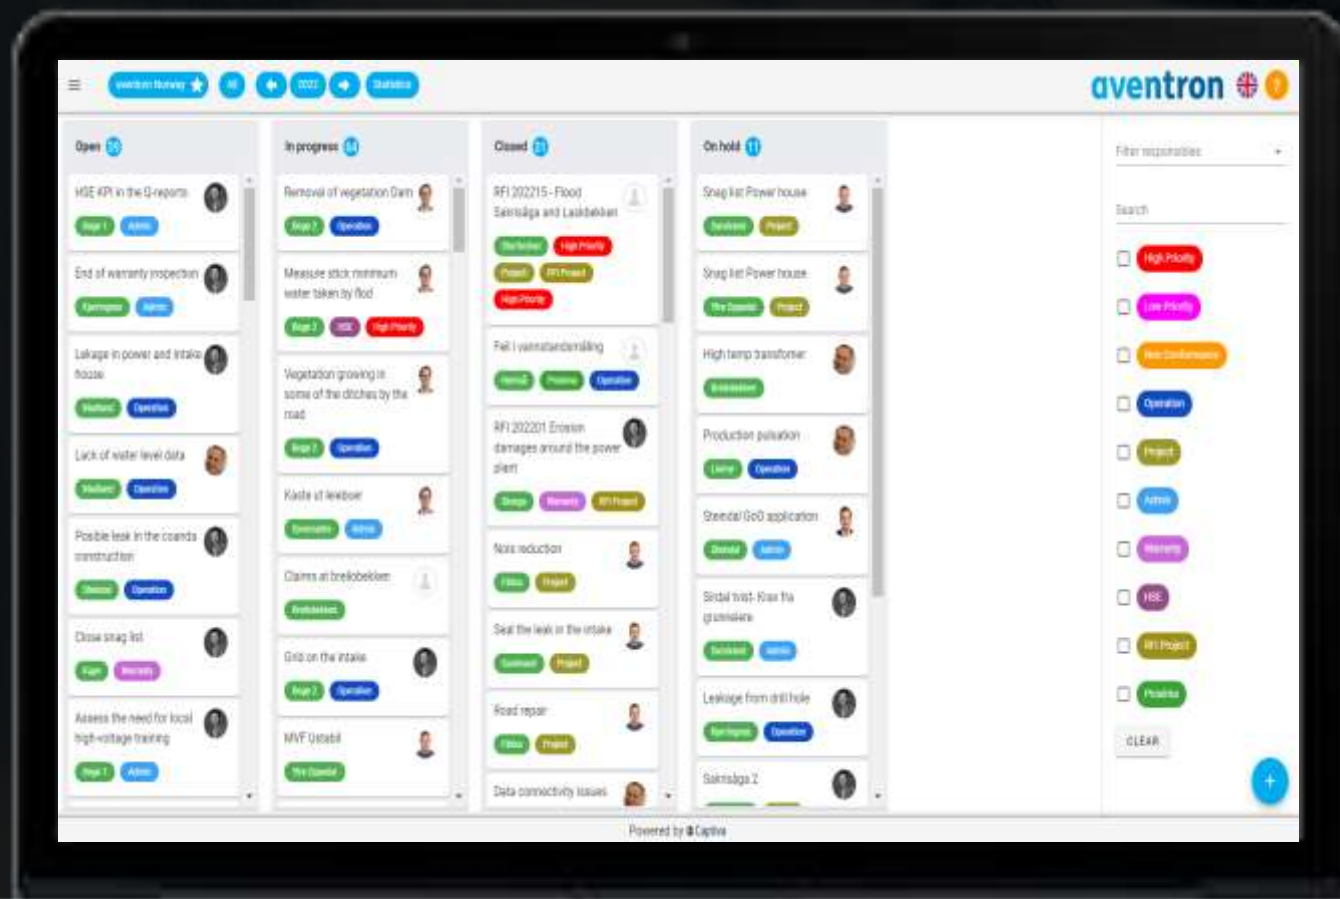

# Samarbeid & transparens

The screenshot displays the Captiva software interface, which is a project management tool. The dashboard is organized into four main columns representing task statuses: Open (5), In progress (4), Closed (1), and On hold (1). Each task card includes a title, a progress bar, and a priority level (e.g., High Priority, Low Priority). The interface also features a search bar and a filter for responsibility, with options like High Priority, Low Priority, New task assigned, Operation, Project, Active, Warranty, HSE, RFI Project, and Planned. The bottom of the screen shows the text "Powered by Captiva".

| Status          | Task Title  | Priority      |
|-----------------|---|---------------|
| Open (5)        | HSE 4PI in the G-reports                              | High Priority |
|                 | End of warranty inspection                            | Low Priority  |
|                 | Leakage in power and intake hoses                     | Medium        |
|                 | Lack of water level data                              | Medium        |
|                 | Possible leak in the coanda construction              | Medium        |
|                 | Close snag list                                       | High          |
|                 | Assess the need for local high-voltage training       | High          |
| In progress (4) | Removal of vegetation Dam                             | Operation     |
|                 | Measure stick minimum water taken by flood            | High Priority |
|                 | Vegetation growing in some of the ditches by the road | Operation     |
|                 | Knife at leakage                                      | Operation     |
| Closed (1)      | RFI 202215 - Flood Sainsåga and Lasköbekken           | High Priority |
| On hold (1)     | Snag list Power house                                 | Project       |
